

Documentation and Coding

Cancer and Cancer-Related Treatments

One in three people in the U.S. will be diagnosed with cancer in their lifetime, according to the [American Cancer Society](#). Accurately and completely coding and documenting cancer and cancer-related treatments may help improve member outcomes and continuity of care. Below is information for outpatient and professional services from the [ICD-10-CM Official Guidelines for Coding and Reporting](#).

Coding Cancer and Cancer-Related Treatments

- To properly code a neoplasm, specify if the neoplasm is benign, in situ, malignant or of uncertain histology. Any metastases should be noted.
- All known treatments and complications should be documented.
- A statement of "History of" indicates the condition is resolved. Don't document "History of" for members with active cancer or current treatment.
- A code from Z85.x, Personal history of malignant neoplasm, is appropriate if a primary malignancy has been previously excised or eradicated from its primary site and there is no further treatment.

Tips to Consider

- Include patient demographics such as name, date of birth and date of service in all progress notes.
- Document legibly, clearly and concisely.
- Ensure a credentialed provider signs and dates all documents.
- Document how each diagnosis was monitored, evaluated, assessed and/or treated on the date of service.
- Note complications with an appropriate treatment plan.
- Take advantage of the Annual Health Assessment or other yearly preventative exam as an opportunity to capture conditions impacting member care.

Sample ICD-10-CM Codes for Neoplasms	
C00-C96	Malignant neoplasms
D00-D09	In situ neoplasms
D10-D36	Benign neoplasm
D3A	Benign endocrine tumors
D37-D48	Neoplasm of uncertain behavior
D49	Neoplasms of unspecified behavior
Z85.0–Z85.9	Personal history of malignant neoplasm
