

Commonly Prescribed Maintenance Medications

Maintenance (or long-term) medications are those drugs you may take on a regular basis to treat conditions such as high cholesterol, high blood pressure or diabetes. Depending on your benefit plan, you may have coverage to get up to a 90-day supply of covered maintenance medication delivered to you through a home delivery program or at select retail pharmacies.

Some plans may require that maintenance medications be obtained through home delivery or select retail pharmacies in order to receive coverage.

Commonly used maintenance medications are listed below. This list is not all-inclusive and may change from time to time.

Most generic drugs listed are followed by a reference brand drug in (parentheses). The brand name drug in parentheses is listed for reference and may not be covered under your benefit. Some drugs in the same dosage form may be used to treat more than one medical condition. In these instances, each medication may be classified according to its first U.S. Food and Drug Administration (FDA) approved use. Some strengths and/or formulations listed may not be covered.

Please note that oral contraceptives are maintenance medications and are part of this list. However, this list does not include the trade names of all available oral contraceptives because there are a large number of products.

Coverage is always subject to the terms and limits of your benefit plan. Please verify with your plan if there are any additional requirements before a drug may be covered. For details about your plan, check your benefit materials or call the number on your member ID card.

Third-party brand names are the property of their respective owners.
