

## CRSP List to be removed from Provider Portal

Because information on the list of Codes Requiring Special Processing (CRSP List) is incorporated into Medical Policies, BCBSMT will remove the list from the Provider Portal effective March 9, 2015.

As a reminder, services described in medical policy may be reviewed for medical necessity. A predetermination request can be submitted prior to the service for review if a provider is uncertain about coverage or if BCBSMT might not consider the service medically necessary.

Predetermination is a process BCBSMT uses to make coverage decisions in accordance with medical policy or group and member contracts for a service, supply, drug, or device used to diagnose or treat an illness or condition. BCBSMT recommends predetermination for services if a provider is uncertain about coverage or if BCBSMT might not consider the service medical necessary.
