

BlueCross BlueShield of Montana

NDC Billing Webinar Registration Information

Blue Cross and Blue Shield of Montana (BCBSMT) is proud to offer complimentary educational webinars to our provider community.

These online training sessions will give you the flexibility to attend live sessions. Provider billers, utilization areas, administrative departments and more will benefit from these webinars. Please review and register for sessions based on your business needs.

Blue Cross and Blue Shield of Montana (BCBSMT) requires the use of National Drug Codes (NDCs) and related information when drugs are billed on professional/ancillary electronic (ANSI 837P) and paper (CMS-1500) claims. As of the May 1, 2015, NDC pricing effective date, professional/ancillary claims for drugs must include NDC data in order to be accepted for processing by BCBSMT.

This webinar will demonstrate available tools for determining proper NDC units, and instruct where the required information should be on claims submitted on or after May 1, 2015.
